

# Transform business processes and reduce costs through the Oracle experts at Maximus Canada

*Public-sector and private-sector organizations alike are looking for digital solutions to data management problems, while finding financial efficiencies. With continuous improvements in information technology, this balance is more attainable than ever. As a solution provider with expertise in technology and the business processes it supports, Maximus Canada takes the lead.*

## Full-Range Service Delivery

From implementing single applications to redesigning entire technology infrastructures, Maximus Canada brings a deep understanding of Enterprise Resource Planning (ERP) solution delivery.

Clients benefit from project management, business process re-engineering, configuration analysis and implementation, and training tailored to meet the clients' business needs.

MAXIMUS Canada has consistently demonstrated its ability to deliver cost-effective ERP solutions of varying size and diverse complexity.

## Snapshot

- Maximus Canada has completed 250+ ERP projects for both public and private-sector clients.
- We have developed numerous customer interfaces and modules to integrate with client information systems.
- Our functional support tasks include development, design, documentation, maintenance, evaluation, support and problem resolution.
- We are adept at
  - Interface development
  - Customization development
  - Database administration services

## Combining Experience and Continuous Improvement

Maximus Canada is one of Atlantic Canada's largest Oracle ERP applications teams. As an Oracle Gold Partner, Maximus Canada has been providing Oracle solutions to public-sector organizations and private-sector companies since 1995.

Our team of experienced consultants keeps pace with the most recent developments in technology and technology management through ongoing training and professional development. The strength of this IT team, coupled with a management team averaging more than 30 years in the IT sector, is a demonstrated combination for success.

Through our DeltaWare Division, Maximus Canada has successfully delivered solutions for public and private sector organizations with revenues ranging from \$1 million to \$1 billion, and from 5 to 500 users.

## Ongoing Support

We manage long-term client relationships through Service Level Agreements. We also work closely with clients to keep their application current, based on Oracle's Product Roadmap strategies and Premier Support policies.

This process ensures our clients remain on a supported platform and can take advantage of new technology and functionality that will improve their total cost of ownership.

## Oracle e-Business Suite

Powerful ERP applications that manage the many interwoven parts of an organization, including:

- Financials
- Logistics
- Asset Lifecycle Management
- Procurement
- Projects
- Manufacturing
- Order Management
- Service

## Oracle PeopleSoft

Human Capital Management (HCM) for enterprise-level organizations, including:

- Human Resources
- Payroll
- Pension Administration
- Benefits
- Performance Management
- Recruiting

PeopleSoft applications are easily configurable to meet unique requirements

## On Premises or in the Cloud

Maximus Canada is proud to be a member of the Oracle Partner Network, and traditionally we have specialized in on-premises applications. This has been an excellent feature for many of our clients who work with sensitive data privacy issues, or who have required their applications to be located on premises. We work each client to find the solution that is best for their circumstances.

Cloud computing now features many of the security features that have previously led clients to choose on-premises solutions. In order to develop and maintain a team of expert functional and technical consultants, Maximus Canada leverages Oracle Cloud Learning Subscriptions and high-quality training through Oracle University. We are committed to continuous education for our employees. Our goals for this continuous learning are to:

- Build and maintain expertise in ERP cloud applications
- Practice continuously using hands-on labs
- Keep pace with new product releases
- Obtain Oracle Cloud certifications
